About Cambridge Healthtech Institute

For over 25 years, Cambridge Healthtech Institute has developed more than 800 conferences, which have attracted over 60,000 attendees from around the world. CHI is the industry leader in offering quality programs that provide valuable new insights and competing points of view while offering balanced coverage of the latest developments in the life science industry. Leading researchers and business experts from top pharmaceutical, biotech, and academic organizations present their most current findings in a forum that features panel discussions and audience participation.

Each year, CHI organizes over 170 annual events geared to the biotech and pharmaceutical industries with specific focuses on Biomarkers, Genomics, Proteins and Proteomics, Drug Discovery & Development, IT and Informatics, Chemistry, Diagnostics & Safety, and Business.

For a comprehensive listing and detailed information about our products and services, please visit: healthtech.com.

PepTalk-The Protein Science Week

January 19-21, 2021

As we face the unprecedented task of fighting this pandemic, we at CHI strongly believe that our community's collective expertise will lead to our success in overcoming it. We are pleased to announce that PepTalk 2021 will be organized as a fully integrated virtual event that will connect the biotherapeutics community, serve as a content hub for the latest research and developments, provide a networking platform, offer a virtual exhibit hall, interactive breakout discussions, research posters, and more.

CHI-PepTalk.com

Molecular Med Tri-Con Virtual Conference & Expo

February 16-18, 2021 • Virtual

The International Molecular Medicine Tri-Conference, entering its 27th year, is the most comprehensive and leading industry events in the personalized medicine space today. The Tri-Conference brings together more than 3,100 innovative thinkers and thought leaders in the field of drug discovery, development and diagnostics, informatics, and digital health throughout pharma, biotech, and academia. Through comprehensive educational programming, valuable networking opportunities, and an expansive exhibit hall, event participants learn first-hand about the emerging developments and advancements of therapeutic, diagnostic, and technology approaches that are advancing precision medicine.

TriConference.com

Sensors Summit

February 24, 2021 • Virtual

Sensor technology is transforming healthcare. Patient outcomes and standardization of care continue to benefit from smarter and more connected devices that provide real-time patient monitoring, early and point-of-care diagnosis, automated alerts, and continuous device performance data. These sophisticated devices necessitate advanced combinations of sensors, materials, power sources, data management, and algorithms to keep the devices specific and sensitive with real-time detection with the additional hurdles of obtaining regulatory and reimbursement approval. This conference will focus on design, development, and commercialization of various sensor and sensorenabled devices in healthcare, including case studies from experts at established OEMs and promising start-ups.

SensorsGlobalSummit.com

SCOPE Summit for Clinical Ops Executives

March 2-4, 2021 • Virtual

Over the course of three stimulating days of in-depth discussions in 23 different conferences, 5 plenary keynote sessions, the 5th annual Participant Engagement Awards, the new China Clinical Development Partnering event and the ever-popular interactive breakout discussions, the programming focuses on advances and innovative solutions in all aspects of clinical trial innovation, planning, management and operations, including: De-Centralized Trials, Site Selection and Management, Patient Engagement, Recruitment and Retention, Protocol Optimization, Feasibility, Telemedicine, Data Strategy and Analytics, Sensors and Wearables, Project Management, Outsourcing, Forecasting, Budgeting and Contracting, Resource Management, Quality (QbD) in Trial Conduct, Risk-Based Monitoring, Artificial Intelligence, Post-Marketing Studies, Observational Research,

Accessing and Generating RWD, Clinical Biomarker Strategy, Clinical Supply Chain, Precision Medicine, Clinical Biomarkers and Biospecimens, and Central Lab Solutions, and expanded coverage on Medical Device Clinical Trial Operations and Regulations and Clinical Supply.

SCOPESummit.com

Bioprocessing Summit Europe

March 16-17, 2021 • Virtual

Bioprocessing Summit Europe brings together leading bioprocessing scientists to share day-to-day challenges and practical solutions for the development, manufacture and quality of antibodies, vaccines and gene therapies. This four track virtual conference, which is the fastest growing bioprocessing conference in Europe, presents detailed case studies and interactive discussions in cell culture, scale-up, continuous processing, recovery, purification, process and product characterization, and formulation.

BioprocessingEurope.com

Biotherapeutics Analytical Summit

March 23, 2021 • Virtual

CHI is proud to be a leader in developing the pathways that spark research innovations, and in connecting the people who drive them, by presenting real-time research and technologies, novel discoveries and best practices from industry front runners and biotherapeutics leaders. We're entering a new era of discovery and finding new ways to connect scientists to innovation. Join your peers at this one-day virtual summit, where leaders in biotherapeutics discovery share insights and experiences, and help turn the gears of innovation to speed development.

BiotherapeuticsAnalyticalSummit.com

Microbiome Leaders Conference

March 24, 2021 • Virtual

Microbiome Leaders Conference addresses both the scientific and clinical progress being made to discover and develop microbiomederived biomarkers, drug targets, and bioactive molecules as potential treatments for chronic disease and health conditions. Through recorded presentations and live panel discussions, leading researchers and thought leaders will explore how the microbiome can become a potential point of intervention to impact progression to disease.

OPT Congress Virtual: Oligonucleotide & **Precision Therapeutics**

March 30-31, 2021 • Virtual

Bringing together leading discovery scientists, developers, CMC experts, regulatory specialists and technology providers, OPT Congress provides a unique opportunity to discuss advances in next-generation oligonucleotide therapies throughout the drug development process. Attend in 2021 to optimize your drug design, delivery and performance, accelerate time to market and achieve commercial success. Based on the resounding success of last year's inaugural 2-day program dedicated to Oligonucleotide CMC & Regulatory Strategies we will once again be adding this content to complement our established Oligonucleotide Discovery and Delivery conference.

OPTCongress.com

PEGS: The Essential Protein Engineering Summit & Cell Therapy Summit

May 11-13, 2021

PEGS Boston Virtual Summit aims to bring you a dynamic online learning and networking experience. Discover research at the forefront of biotherapeutics development and breakthroughs, hear inspiring keynote presentations, interact with global participants, join live Q&A panels and breakout discussions, visit our online exhibit hall and chat with service providers and poster presenters, and receive an on-demand library of presentations.

Strategic Alliance Management Congress Virtual

May 18-19, 2021 • Virtual

As the biopharmaceutical industry continues to rely on alliances and collaboration with external organizations to access innovation and obtain market access, internal teams are often confronted with the increasing complexities of systematically and effectively managing partnerships throughout their lifecycle. The function and organizational capability of Alliance Management is now recognized as a critical means to ensure the successful execution of any strategic partnership, acting as a central driver of value, while alleviating aggravations, and meeting alliance goals. Now in its seventeenth year, Strategic Alliance Management Congress will again unite senior alliance management, business development, project management, technology transfer, and licensing professionals to network, discuss case studies, and share the components that cultivate successful partnerships. Delegates will gain strategic insights, proven tools, methods, and perspectives from a variety of leaders advancing the art of Alliance Management.

Drug Discovery Chemistry

May 18-20, 2021 • Virtual

More than 600 attendees participated virtually in 2020 with 72% of delegates from pharma/biotech and 13% from academia or government. 66% of attendees were scientists/technologists and 20% were executives/directors. Delegate feedback was extremely positive with 72% of attendees saying they were very satisfied or satisfied with the virtual event. The ability to join favorite speakers live, while watching others on-demand at their convenience, was one of the most popular features with attendees. Other delegates appreciated the ability to connect with the right attendees via direct message and private Zoom rooms.

Our Vision

At Cambridge Healthtech Institute (CHI), we believe bringing together a unique and diverse constellation of innovators, scientists, and life science professionals can hold the key to developing tomorrow's cures and diagnostics.

We are a life science network for leading researchers and business experts from top pharmaceutical, biotech, and academic organizations. CHI's product portfolio includes Cambridge Healthtech Institute Conferences, Barnett International, Insight Pharma Reports, and Cambridge Innovation Publishing, consisting of Bio-IT World, Clinical Informatics News, and Diagnostics World.
